

# Project Completion Report

**Project Title: Goat Raising**

**Beneficiaries: 10 indigent families**

**Location: Sitio Lomboy, Guiset Norte San Manuel Pangasinan**

**Project Cost: Php 100k/ \$1,785**

# Project Summary:

The Goat Raising Livelihood Project was implemented to alleviate poverty and improve the living conditions of 10 indigent families within the PCGAMI – House of Prayer Church community. The project aimed to leverage the natural resources available in the area, particularly the wide-open fields suitable for goat grazing, to provide a sustainable source of income for the beneficiaries.

# Key Accomplishments:

## Successful Goat Distribution

The project successfully distributed goats to the 10 beneficiary families, providing them with a foundation for their goat-rearing enterprises.

## Increased Income

The families have experienced an increase in their income through the sale of goat milk, meat, and offspring. This has improved their financial stability and ability to meet basic needs.

# Improved Food Security

The project has contributed to enhanced food security for the beneficiaries, as they now have access to a source of nutritious goat milk and meat for their own consumption..

# Community Empowerment

The project has empowered the beneficiaries with the knowledge and skills to manage their goat-rearing businesses effectively. This has boosted their confidence and self-reliance, contributing to their overall well-being.

## Sustainable Livelihood

The project has established a sustainable livelihood model by incorporating a "pass-on-the-gift" mechanism, where beneficiaries share offspring with other families in need. This ensures the continued impact of the project and fosters a spirit of community sharing and support.

# Challenges and Solutions:

**Limited Initial Capital:** The project budget limited the number of goats that could be distributed. However, the "pass-on-the-gift" system helped to address this limitation by creating a self-sustaining model where the benefits of the project are extended to more families over time.

**Disease Outbreaks:** The risk of disease outbreaks among the goats was mitigated through proactive measures, such as regular veterinary check-ups, vaccinations, and training on hygiene and sanitation practices.

**Market Access:** The project team worked to identify and connect the beneficiaries with potential buyers for their goat products, ensuring a consistent demand and fair prices for their goods.

# Overall Impact:

The Goat Raising Livelihood Project has significantly impacted the lives of the beneficiary families. It has provided them with a sustainable source of income, improved their food security, and empowered them with valuable skills and knowledge. The project has also fostered a sense of community and promoted the spirit of sharing within the church community.

# Future Recommendations:

- **Expand the Project:** Consider expanding the project to reach more families in need within the community and neighboring areas.
- **Provide Advanced Training:** Offer advanced training on goat breeding, nutrition, and healthcare management to further enhance the productivity and profitability of the goat-rearing businesses.
- **Establish Market Linkages:** Strengthen connections with local markets, restaurants, and other potential buyers to ensure a steady demand for goat products and maximize income potential for the beneficiaries.
- **Monitor and Evaluate:** Continue to monitor and evaluate the project's impact to identify areas for improvement and ensure its long-term sustainability.

**Thank you, Pure  
Bayanihan!**
